This is L.Brador.

Behind all our clothes and products lies a very clear concept. That they should make your working day safer, more comfortable and more functional, and we believe that high quality, good design and smart functions always go hand in hand. In this workbook, we have gathered everything that is new for this year, along with the most important products for a comfortable and flexible working day.

WORKMOVE™

WORLD'S BEST WORK TROUSERS.

That's probably the case. Let us tell you a bit about that goal and what gives us the confidence to say this.

L.Brador offers an extensive range of high-quality workwear. We are particularly proud of our range of stretch trousers, which we call "WorkMove".

To make it simple to find the right trousers for different professions and work situations, we've grouped our stretch trousers into three categories: WorkMove Max, WorkMove Medium and WorkMove Light. They are all designed to follow the natural movements of the body and be suitable for different types of work and work environments.

To achieve this, we work with the best materials in the market, Cordura, Kevlar and Dyneema stretch fabrics. Guaranteeing outstanding comfort, ease of movement and durability. No matter which category of stretch trousers you choose, you can be sure of superior day-long comfort.

And one thing is certain. Our top-quality work trousers compare very favourably against others on the market. Follow the example of thousands of professionals all over Scandinavia. Pull on a pair of our work trousers and feel the difference.

**MORE RESISTANT TO
ABRASION THAN OTHER
WORKWEAR KNEE
POCKETS.**

FIND THE RIGHT TROUSERS FOR YOUR NEEDS.

Excellent quality goes a long way, but work trousers are not perfect unless they really suit the needs of your job. L.Brador's work trousers with stretch are grouped into three categories: WorkMove Max, WorkMove Medium and WorkMove Light, all designed to provide optimal comfort, freedom of movement and lasting wear. Take a closer look at the symbols below to find the right trousers for your needs.

STRETCH YOUR LIMITS

1050PB MOMENTUM

22

Try something New.

The 1050PB Momentum stretch trousers are a completely new and exceptionally flexible model of work trousers, combining maximum flexibility with extreme durability, and here nothing has been left to chance. The main material used in the design of the trousers is Cordura and the knee pockets are made from the extremely durable stretch material Dyneema. The adjustable waistband and the trousers' articulated knees also give the trousers a slimmer fit, which contributes to the exceptionally high level of flexibility.

1050PB MOMENTUM

PROPERTIES AND USER BENEFITS

- Full-stretch trousers in Cordura four-way stretch for extremely good mobility, comfort and airiness.
- Adjustable waistband in a sturdy material for the best fit.
- Nail pockets, leg pockets and folding rule pocket in a sturdy material.
- Stretch and a narrower fit help make close fitting trousers with optimal comfort.
- Preshaped knees for better fit and flexibility.
- Reinforced knee-pad pockets in Dyneema (four-way stretch).
- Nail pockets have sections with a zipper for bits.
- Leg pocket with zipper for better safety.
- Extendable by 5 cm.

MATERIAL AND WEIGHT:

88% polyamide, 12% elastane. 275 g/m².

SIZE

44-60, D84-D104

The trousers for craftsmen.

1050PB Momentum is made completely from stretch material and could be described as the king of trousers. Here we combine maximum movability with extreme durability. The trousers are light and flexible, developed in close collaboration with our users – and based on high standards of comfort and quality.

WORKMOVE™
MAX

WORKMOVE™
MAX

1052PB

PROPERTIES AND USER BENEFITS

- Heavy-duty semi-panama weave in polyester/cotton for best durability.
- Stretch material across the seat, front, crotch and front and back side of the knee for extremely good mobility, comfort and airiness.
- Stretch material and a slimmer fit provide more fitted trousers with knee protection that stays in place.
- Reinforced knee pad pockets in stretch kevlar provide good mobility and durability.
- Preshaped knees for better fit and flexibility.
- Reinforced hanging pockets with larger volume.
- Ventilation on inside thigh regulated with zip, internal mesh keeps the user cool.
- Left leg pocket with zipper and phone pocket with a magnetic clasp to keep the phone protected and in place.
- Extendable by 5 cm.

MATERIAL AND WEIGHT:

65% polyester, 35% cotton. 325 g/m².

SIZE

44-60, D84-D120

1053PB

PROPERTIES AND USER BENEFITS

- Heavyweight semi-panama weave in polyester/cotton for best wear resistance.
- Stretch fabric across seat, front, and crotch for excellent mobility, comfort and airiness.
- Stretch and a narrower fit create more fitted shorts.
- Reinforced hanging pockets with large volume.
- Left leg pocket with zipper and phone pocket with a magnetic clasp to keep the phone protected and in place.

169PB

PROPERTIES AND USER BENEFITS

- Heavy-duty semi-panama weave in polyester/cotton for best durability.
- Stretch material across the seat, front, crotch and front and back side of the knee for extremely good mobility, comfort and airiness.
- Stretch material and a slimmer fit provide more fitted trousers with knee protection that stays in place.
- A specially designed flooring pocket on the right thigh reinforced with metal weave cut protection protects the user against sharp tools.
- Reinforced extra long knee pad pockets in stretch kevlar provide good mobility and durability.
- Preshaped knees with zip and ventilation at the back of the knee for individual fit and flexibility.
- Reinforced hanging pockets with larger volume.
- Ventilation on inside thigh regulated with zip, internal mesh keeps the user cool.
- Left leg pocket with zipper and phone pocket with a magnetic clasp to keep the phone protected and in place.
- Elastic at the hem to keep the trousers clear from, for instance, newly painted surfaces.

MATERIAL AND WEIGHT:

65% polyester, 35% cotton. 325 g/m².

SIZE

44-60, D84-D120

WORKMOVE™
MAX

184PB

- Breathable canvas stretch fabric for optimal comfort and good durability.
- Reinforced with 4-way Cordura stretch material over the seat, front, crotch as well as the front and rear sections of the knee for extremely good mobility, comfort and ventilation.
- The stretch panels, stretch in the main fabric and narrower fit create a body-hugging trouser.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced 4-way stretch knee-pad pockets provide good mobility and durability.
- Inside pocket for knee pad.
- Left-hand leg pocket with external mobile phone pocket.
- Right-hand leg pocket with simpler folding rule pocket and extra pockets.
- Extendable by 5 cm.
-

MATERIAL AND WEIGHT:

63% Polyester, 34% Cotton, 3% Elastane. 275 g/m².

SIZE

SIZE

44-60, D84-D120

Be seen, be safe.

With the aim of improving the working environment for today's professional drivers, these trousers were developed in close concert with the industry. A journey which resulted in, among other things, a strong half-Panama weave in polyester/cotton/elastane, 7 millimetres of cushioning on the knees and adjustable ventilation on the inner thigh for truly great comfort. What's more, the reinforced knee-pad pockets provide both good mobility and extreme durability.

L.BRADOR 117PB / 416P / 5002AE

AVOID SCRATCHES IN PAINTWORK.

Workwear can cause scratches on, for example, vehicles or painted industrial products. With L.Brador's No-Scratch-Trousers, this risk is eliminated.

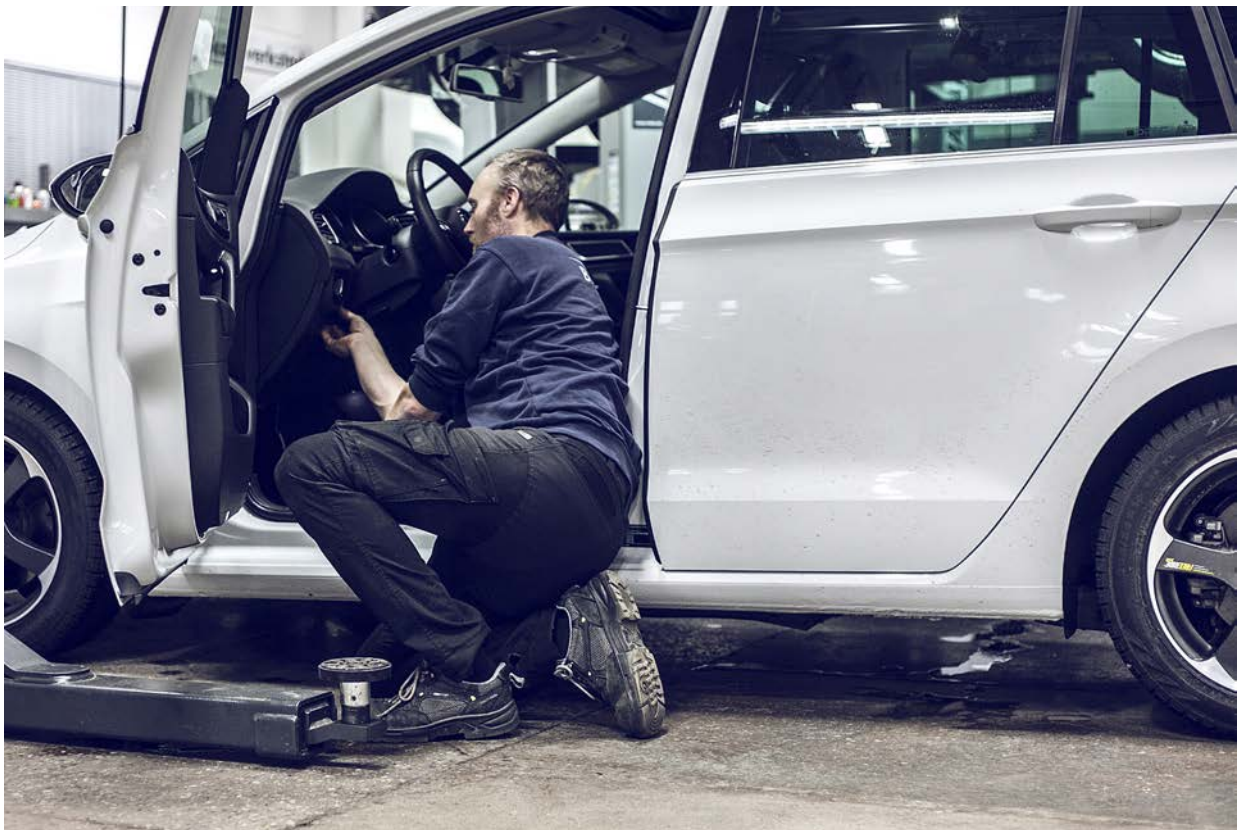

Concealed metal detailing – this is the hallmark of L.Brador's No-Scratch-Trousers. This eliminates the risk of causing scratches, and the range has been developed specifically for professions that often handle sensitive products and materials. Vehicle workshops, valeting companies and cabinet makers are examples of applications where No-Scratch will be of benefit.

The trousers are made of a lighter material, making them particularly suitable for indoor work, and with Cordura stretch in the right places, there is also a high level of mobility and comfort.

NO-SCRATCH IS AVAILABLE IN FOUR MODELS:

1843PB, 1844PB and 1845PB.

WORKMOVE™

OUR RESPONSIBILITY

”

FOR US, IT'S IMPORTANT THAT OUR GARMENTS HAVE WHAT IT TAKES TO BE WORN ALL DAY, EVERY DAY OF THE WORK WEEK.

The sustainable garment.

These are garments you wear day in and day out. Garments that really last. We know that our customers wear our garments throughout their entire workday, every day of the week. It is therefore important to us that we can offer garments that really do live up to their promise, every single day.

Our goal is to identify where our environmental impact is the largest and then do everything we can to lower it. Accordingly, our focus is on manufacturing. Our products should be extremely durable and long-lasting, without compromising on comfort or function.

This is why L.Brador always strives to ensure that its products have the longest possible lifespan. And, we apply a lifecycle perspective to every step in the product development process, from the selection of materials and functionality to their timeless design.

We test our garments over and over again.

When choosing materials, we always strive to use the most durable materials possible that will still offer maximum comfort. We also give careful consideration to how each garment will be used by those working in different trades and industries. We want our garments to maintain good quality throughout their lifespan, which is why we test them, over and over again, to ensure that all materials and finished garments live up to our high quality requirements.

The garments are tested during the development of our own test pilots who are out in the real world and by our suppliers, in our own lab in Ulricehamn and with third parties. Everything to ensure that the garments meet our requirements. Checks are then made continuously throughout the entire production flow to detect and rectify any deviations. We also do a final quality inspection in production, where a third party visits the factory. A large number of garments are checked during these inspections. When the garments arrive at our warehouse, we also do our own arrival check to ensure the quality.

If a garment has not lived up to expectations, we will investigate the reason for the complaint and try to understand what happened and how we can avoid it happening again. Our customers' feedback and opinions are important to us.

All of the garments we sell must be safe. This means that they must not contain any chemicals that are harmful to those who wear the garments or the environment. We always prioritize working with OEKO-TEX certified materials and accessories in order to ensure that there are no harmful substances in our end products. Furthermore, we collaborate with our suppliers to ensure that the garments do not contain substances at levels that are forbidden, regulated in legislation or on our own restriction list. Samples are taken based on risk assessments to ensure that the garments are safe.

CARE FOR YOUR WEAR

STORAGE

WHEN NOT USING YOUR WORK CLOTHES, STORE THEM WASHED, IN A CLEAN, DRY AND DARK PLACE.

Take good care of your garment.

The most important thing we all can do is to use what we have as long as possible. Our responsibility is to develop garments that last a long time. Yours is to take good care of them. With this in mind, we've compiled a list of things you can do to take the best possible care of your garments.

For our certified protective garments, it is important that you follow the care instructions that were included with the purchase so that the garment retains its protective properties.

What do I do with the garment after I'm done using it?

Can you give it to someone else who might still be able to use it?

If yes, please do!

Is it impossible to clean or repair it?

Check with your municipality and/or employer to find out how textile waste is managed.

If the garment has been contaminated by something, make sure that you sort it correctly in accordance with the applicable environmental regulations.

General washing instructions.

- Follow the washing instructions. They are there for a reason!
- For certified garments, it is particularly important that you follow the washing instructions to ensure that the protective properties are maintained.
- Wool fibres have self-cleaning properties, so all you need to do with your wool garments is hang them outside to air.
- If there are any stains, try to wipe them off as quickly as possible.
- If the garment gets very dirty, try to brush off as much dirt as you can.
- Remove any stones, screws and other items from the pockets before washing.
- Close all pockets and openings that have zippers, velcro or snap fasteners. Leave button closures open.
- Wash garments with similar colours together.
- Wash certified garments together with others that have the same certification.
- Wash certified garments when they look dirty so that they retain their protective properties.
- Do not use bleach.
- Do not use fabric softener. It could damage the reflectors and other parts of the garment.

ATTENTION!

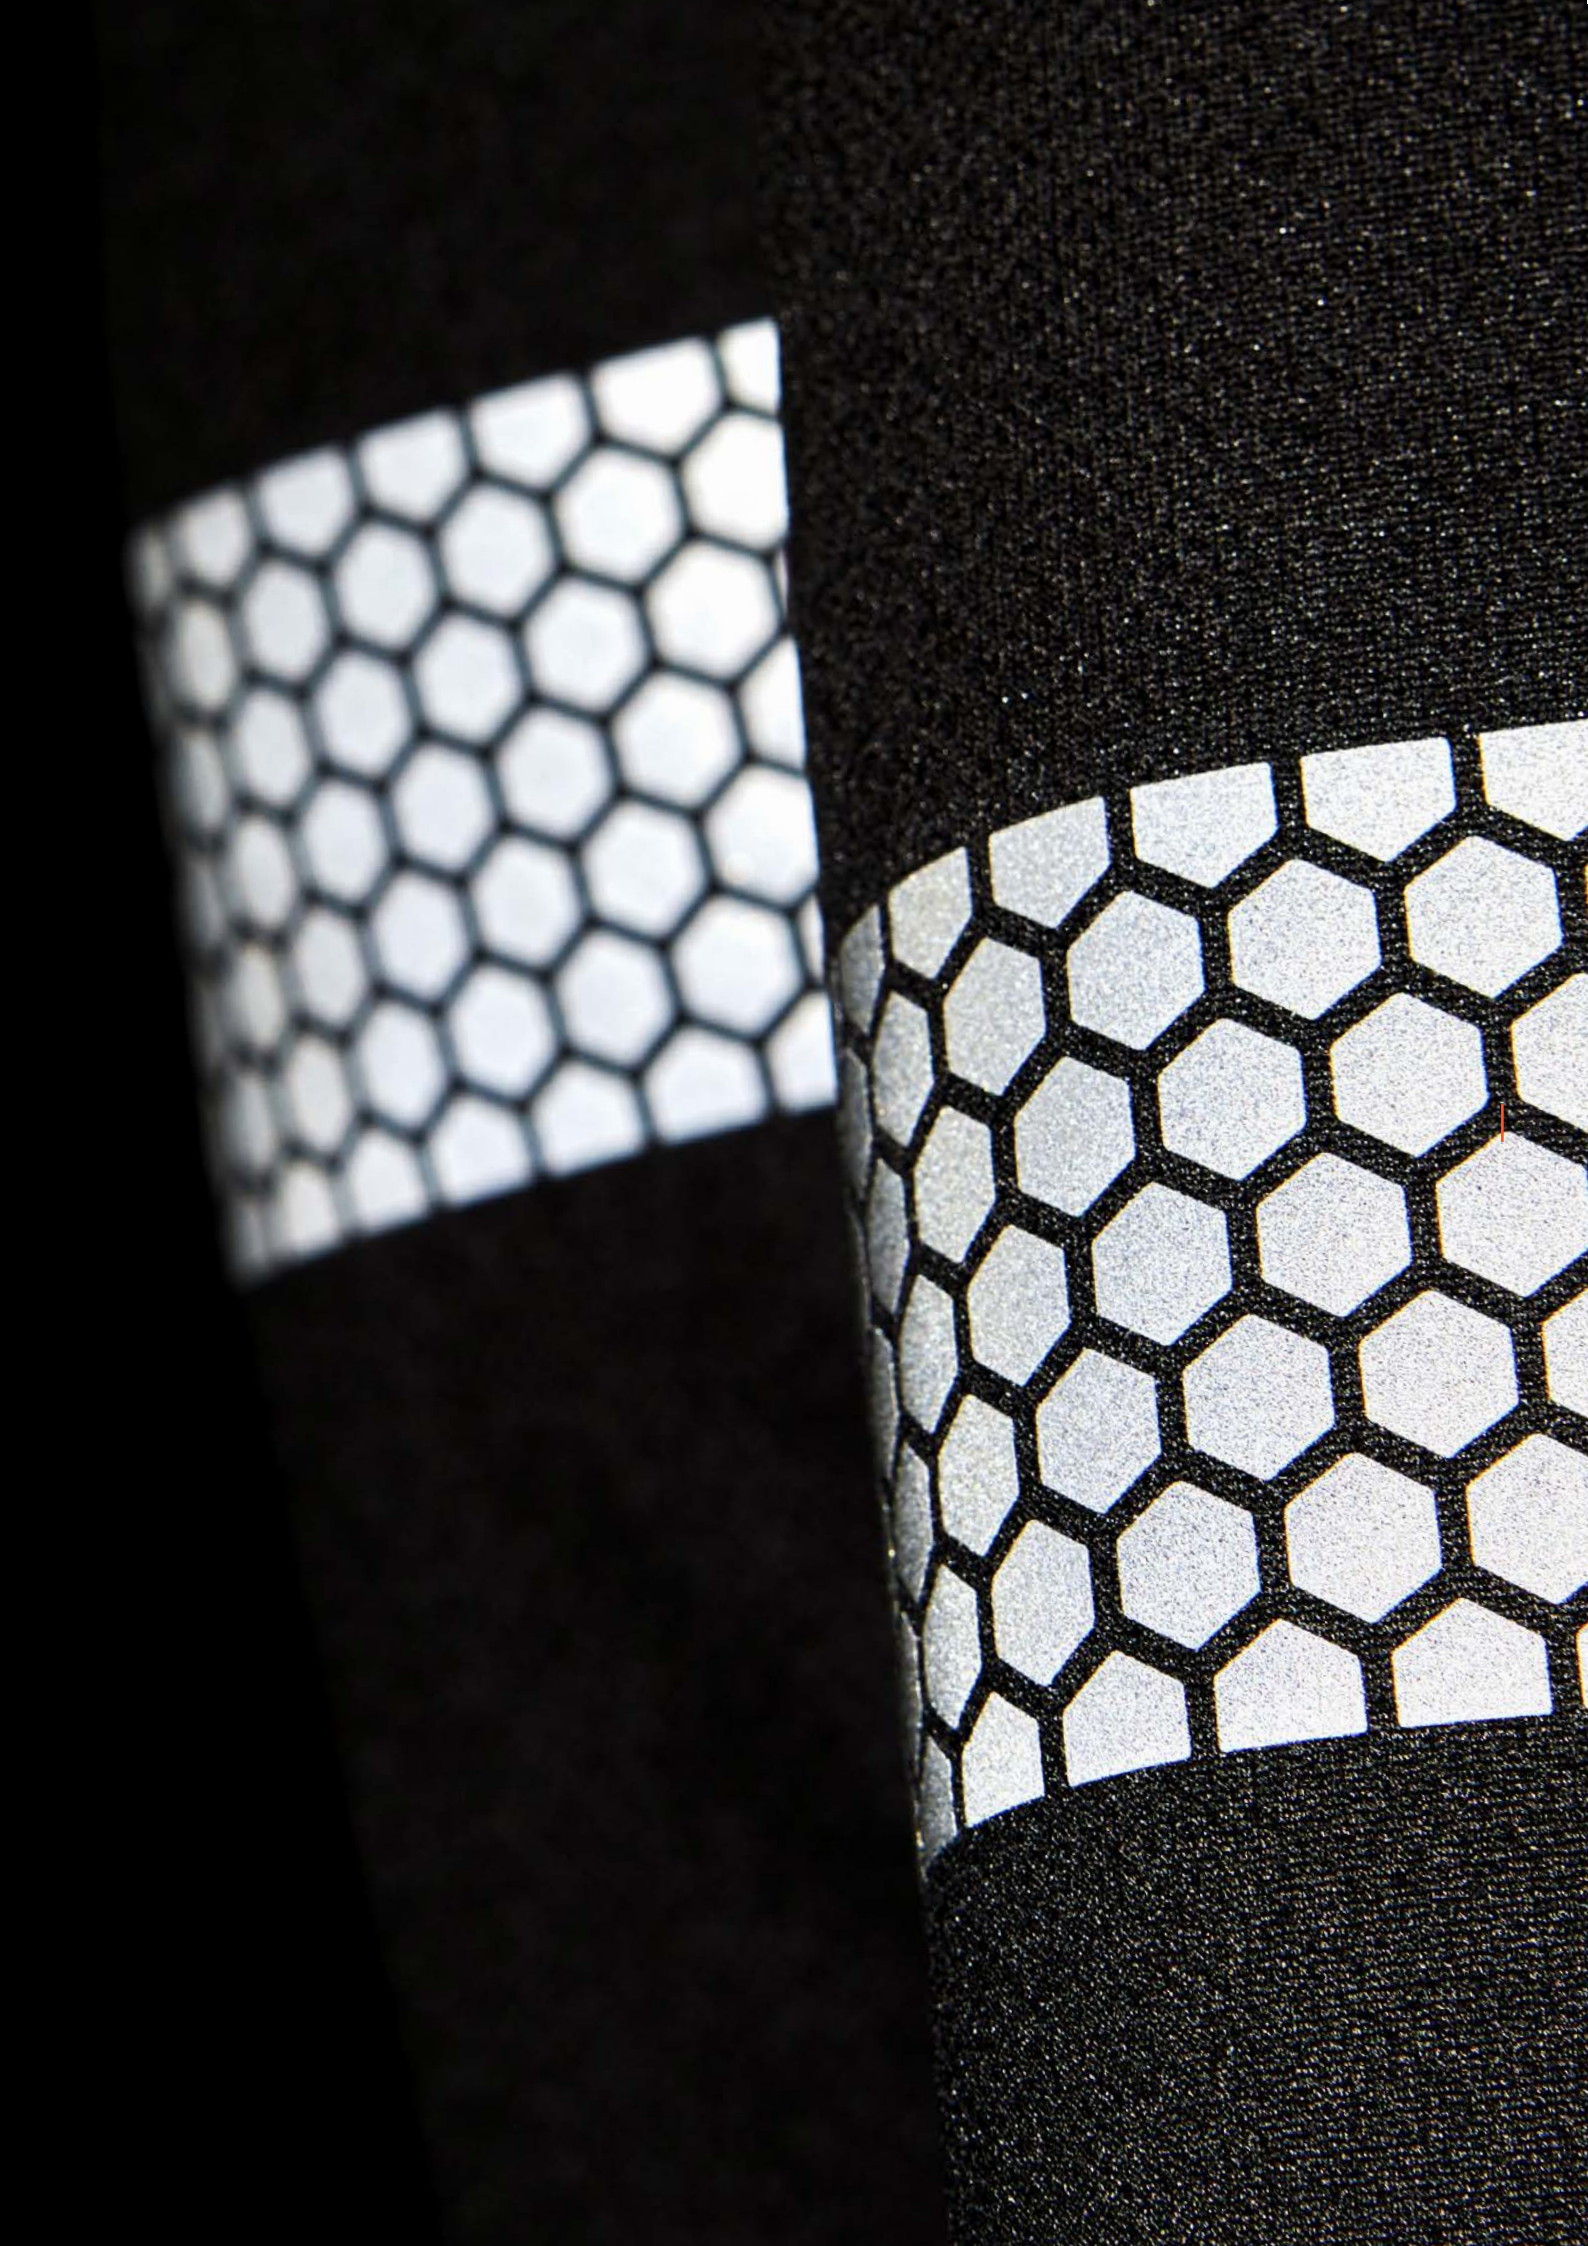

STAY SAFE AT WORK

CAN WE HAVE YOUR **ATTENTION**, PLEASE?

“If you can't be seen, then you're not there,” they say. We wouldn't go that far but, on the hand, we know the following to be true: “You can only be seen if you make yourself visible”. It's as simple as that. No matter what industry you work in or what your working day is like, you are safer when others can see you more easily.

Different environments involve different degrees of risk, and so we – and the rest of the industry – categorise our Hi-Vis clothing into three different classes. This makes it easier to choose, and easier to know exactly what garment you need.

We develop and design all of our Hi-Vis clothing with the same eye for detail and quality as other products and, for us, it goes without saying that they should be just as stylish, have the same good fit and the same smart functions as garments that are not Hi-Vis. That they will be equally comfortable is something you can also take for granted. Therefore, most of our HI-VIS garments have reflective panels with stretch. With L.Brador Hi-Vis, you can also be assured of long-lasting garments and reflective details that you can trust to make you visible – from a long distance, and for a long time.

430P / 430P-W

PROPERTIES AND USER BENEFITS

- Warm-lined.
- The weave structure ensures a strong garment.
- Wind and waterproof with good breathability and taped seams.
- Close fit.
- Extended back to keep the hollow of the back warm.
- Triple front placket protects the zip against wear and tear, gives good wind protection and, moreover, protects against water penetration.
- Covered zips to prevent water penetration.
- Adjustable at the waist hem for best fit.
- Adjustable and detachable hood.
- Fleece-lined pockets and inner fleece-lined collar with an extra high neck.
- Preshaped sleeves.
- Knitted inner cuff with thumb grip at the end.
- The 3M reflective panels are flexible and offer a degree of stretch with good breathability, as well as greater durability as they stand up better to wear and tear in the wash.
- Matches the structure and colour of 189P trousers and is certified in compliance with EN 342.

 Women: EN 342, EN 343 3.1 and EN ISO 20471, class 2 for XS-S, class 3 for M ->.

SIZE

Men: XS-5XL, WOMEN: XS-2XL

Make long days easier.

A longer jacket for those who work in really cold and windy environments and who want outerwear that can handle a really tough day at work. This model, which is also available in women's sizes, meets the very strict requirements of the EN standard for visibility and hi-vis clothing. The jacket is designed according to the same principle as the rest of our Hi-Vis Collection – with premium-quality designs, details and materials that protect against wind, cold and rain.

185PB

PROPERTIES AND USER BENEFITS

- Breathable canvas stretch fabric for optimal comfort and good durability.
- Reinforced with 4-way Cordura stretch material over the seat, front, crotch and back of knee for extremely good mobility, comfort and ventilation.
- The stretch panels, stretch in the main fabric and narrower fit create a body-hugging trouser.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced 4-way stretch knee-pad pockets provide good mobility and durability.
- Integral 7 mm knee cushion for cushioning and comfort.
- Ventilation on the inside is regulated by a zip to keep the wearer cool.
- The reflective panels are flexible and offer a degree of stretch with good breathability, as well as greater durability as they stand up better to wear and tear in the wash.
- Extendible by 5 cm.

MATERIAL AND WEIGHT:

63% Polyester, 34% Cotton, 3% Elastane. 275 g/m². 3M reflective material.

Be seen, be safe.

With the aim of improving the working environment for today's professional drivers, these trousers were developed in close concert with the industry. A journey which resulted in, among other things, a strong half-Panama weave in polyester/cotton/elastane, 7 millimetres of cushioning on the knees and adjustable ventilation on the inner thigh for truly great comfort. Moreover, the reinforced 4-way stretch knee-pad pockets offer good mobility and extreme durability.

PROPERTIES AND USER BENEFITS

- Water and dirt-repellent.
- The weave structure ensures a strong garment.
- Stretch material in the front and front and rear sections of the knee for extremely good movability, comfort and ventilation.
- Using stretch material and a narrower fit gives a more body-hugging trouser with knee-pads that stay put.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced knee-pad pockets in stretch Kevlar provide both good movability and durability.
- Extendible by 5 cm.
- Reinforced hanging pockets.
- Matches the structure and colour of jackets 425PB, 203PB, 204PB and 225PB.
- The reflective panels are flexible and offer a degree of stretch with good breathability, as well as greater durability as they stand up better to wear and tear in the wash.

NEWS!

**VISIBLE.
DURABLE.
FLEXIBLE.**

Discover a whole new level of comfort when wearing hi-vis workwear. With FlexiComb™ you have reflective panels that are stretchy so that you have full mobility. So that feeling of having a reflective belt around the waist is a thing of the past with FlexiComb.

It is also much more robust than a traditional reflector. You can rest assured that you'll be visible and safe in the workplace even if you wash the garment several times a week.

HI-VIS CERTIFIED GARMENTS

Hi-Vis certified garments are divided into three different classes, based on how well the wearer is visible. The garments have fluorescent surfaces and reflectors that meet the certification requirements for design, eg the minimum width of the reflector must be 50 mm. The materials are tested before and after washing, 5 washes is a minimum and if the garment has been tested and approved for a higher number of washes, this must be stated on the washing thread.

HI-VIS
CLASS 3

CLASS 3

The garments are provided with fluorescent material, with an area of at least 0.80 m² and reflectors with an area of at least 0.20 m², for use where the highest level of visibility is required.

HI-VIS
CLASS 2

CLASS 2

Garments fitted with fluorescent fabric, with an area of at least 0.50 m² and reflectors with an area of at least 0.13 m², for use where the visibility requirement is not as high as Class 3.

HI-VIS
CLASS 1

CLASS 1

Garments fitted with fluorescent material with an area of at least 0.14 m² and reflectors with an area of at least 0.10 m², for use where the requirement is the lowest certified level for visibility.

WINTERGUARD™

STOP THE COLD, NOT THE WORK.

Cold, snow and icy winds – in Sweden we know what winter entails. We also know that a winter is what you make of it. At L.Brador, we make workwear that warms. Our Winterguard jackets build on the success of the bestseller 430P and are developed here in the Nordic climate.

They boast qualities that let you carry on as normal even when the temperature drops and the winds pick up. Thanks to the high-quality materials and details such as covered zips, they are the best and safest bet for winter. Use our knowledge of winter to help keep you warm and comfortable at work. Colder days will soon be upon us.

WINTER JACKETETS

AVAILABLE IN
WOMEN'S MODEL

2100P/2100P-W

PROPERTIES AND USER BENEFITS

- Lined.
- The fabric structure provides a durable garment.
- Waterproof and windproof with good breathability and taped seams.
- Body-close fit.
- Extended back to keep the lap warm.
- Triple front bump protects the zipper against wear, provides good wind protection and above all, protection against wet penetration.
- Covered zippers to prevent wet penetration.
- Adjustable waist and hem for best fit.
- Adjustable and removable hood.
- Fleece lined pockets and inner fleece lined collar which is extra high at the neck.
- Pre-bent sleeves.
- Knitted inner cuff with thumb grip at sleeve end.
- Hidden reflections on zippers and shoulder sections for extra visibility.
- Wind-protected Napoleon pocket that retains body heat and thus provides extended battery life on electronics, such as mobile phones etc.
- Matches the structure and colour of 190P trousers and is certified in compliance with EN 342.

MATERIAL AND WEIGHT:

100% polyester, 255 g/m²

LAYER-ON-LAYER

Winter can be rough in the Nordic countries, with sub-zero temperatures, heavy snow/rain and cold winds. That's why it is so important to choose the right clothes that will keep you warm and dry while you work. With layering, there is air between each garment. The air offers good insulation and makes it easier for you to stay warm. This is why it's often better to put on several thin layers of clothing instead of one thick garment. The garments are constructed of wicking fabrics, which draw sweat and moisture away from the body.

LAYER 1

6030BV

T-shirt in bamboo fabric, which has temperature-regulating and moisture-wicking properties to keep you cool all day long.

LAYER 2

6024P

Soft, comfortable sweatshirt with a brushed inside.

LAYER 3

2220P/2220P-W

Water and windproof shell jacket in stretch fabric for excellent mobility.

717UP

Soft, comfortable sweater in merino wool for maximum warmth and wicking properties, which draw sweat and moisture away from the body.

2005U / 2005U-W

Wool sweater that maintains an even and comfortable temperature, is breathable and does not easily absorb odours.

2100P / 2100P-W

Wind and watertight winter jacket with warm lining in a slightly longer model. Good breathability.

2003P

PROPERTIES AND USER BENEFITS

- Soft Softshell in four-way stretch material for a comfortable garment with good stretch properties.
- Water-repellent and windproof with good breathability.
- Extended back section.
- Inner material in soft stretch jersey.
- Elastic cuffs and hem.
- Two front pockets and one chest pocket.
- Loop for ID card holder.

MATERIAL AND WEIGHT:

92% polyester, 8% spandex. 230 g/m²

SIZE

XS-3XL

554P

TOPS

A top that we hold close to our hearts.

This comfortable felted wool top is made in collaboration with Ivanhoe of Sweden, a family company from Gällstad that has made knitted wool garments for seventy years. The material is completely natural, and has numerous exceptional characteristics. Above all, it maintains an even and comfortable temperature, it is breathable and it does not easily absorb odours. Nature was really at the races with this product development: it even cleans itself as long as it is aired.

2005U

PROPERTIES AND USER BENEFITS

- Swedish-made in felted wool of the highest quality.
- Very high comfort as the material helps maintain a naturally even temperature and is quick-drying.
- Wool is a material with unique characteristics.
- It warms just as well even if it is damp.
- Wool has a natural resistance to odours and dirt and it often suffices to simply air the garment instead of washing.

MATERIAL AND WEIGHT:

100% wool. 450g/m².

WOMENS-WEAR

430P-W

PROPERTIES AND USER BENEFITS

- Warm-lined.
- The weave structure ensures a strong garment.
- Wind and waterproof with good breathability and taped seams.
- Close fit.
- Extended back to keep the hollow of the back warm.
- Triple front placket protects the zip against wear and tear, gives good wind protection and, moreover, protects against water penetration.
- Covered zips to prevent water penetration.
- Adjustable at the waist hem for best fit.
- Adjustable and detachable hood.
- Fleece-lined pockets and inner fleece-lined collar with an extra high neck.
- Preshaped sleeves.
- Knitted inner cuff with thumb grip at the end.
- The 3M reflective panels are flexible and offer a degree of stretch with good breathability, as well as greater durability as they stand up better to wear and tear in the wash.
- Matches the structure and colour of 189P trousers and is certified in compliance with EN 342.

MATERIAL AND WEIGHT:

100% polyester. 265 g/m². 3M-reflective material.

A full-page photograph of a worker in a high-visibility yellow rain suit operating machinery in the rain at night. The worker is wearing a hooded rain jacket with reflective silver stripes and dark pants. They are holding a handle of a piece of equipment. The background is dark with a bright light source on the left, creating a lens flare. The scene is filled with rain, which is visible as numerous white streaks. The overall mood is industrial and rugged.

RAIN-WEAR

WORKDRY™

STOP THE RAIN, NOT THE WORK.

117

Swedes have a special relationship to rain. The wet season typically starts in August and ends in July. A situation that demands solid know-how of water-resistant workwear. WorkDry™—a collection of jackets and trousers for rainy working days.

Divided into three different categories, it ranges from simple, functional rainwear to premium clothing in PVC with many smart features. While you cannot avoid the rain, you no longer need to schedule your work around it.

STAY ACTIVE. STAY WARM.

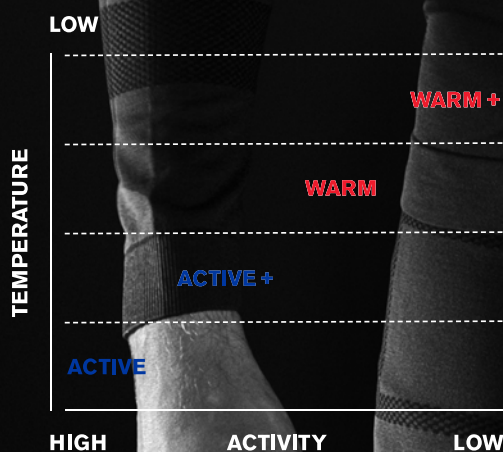

Being properly clothed for your working day is at least as important as having the right tools and equipment. And the most crucial roles are played by the garments that you have closest to your body: your socks and your underwear. These hidden clothing heroes seldom get much attention, but in fact they are almost essential to the way your day ends up.

Your underwear and your socks have a couple of truly important tasks. They have to keep you optimally warm, and also to transport moisture away from the skin.

We offer several variants that all fulfil those exact purposes – but they are all ideal for just the right temperature and work. To make it easier for you to choose, we have divided our socks and underwear into four categories, or levels if you prefer.

All models and variants feature the same high quality and carefully selected materials, but with varying degrees of warmth and wicking - from cool with a high level of wicking, to really warm and comfortable, with a lesser degree of wicking.

The model you choose depends on the type of work you do, your own temperature, the season, how much you move about and whether you're working indoors or outdoors.

ACTIVE

Optimal moisture transport to keep body cool and dry for highly active work

SOCKS: 760UA

730P

PROPERTIES AND USER BENEFITS

- Set consisting of round-necked undershirt and long-johns.
- Optimal wicking with warming properties for high activity work.

MATERIAL AND WEIGHT:
100% polyester. 170 g/m².

SIZE
XS-5XL

The right feeling all day long.

A comfortable feeling always starts next to the body. With 730P you get a complete undergarment with a perfect combination of wicking and warmth. The undergarment is a part of Active+ and is especially suitable if you are out and about and getting warm when working, and consequently need wicking, but at the same time need an undergarment that retains the warmth.

L.BRADOR 1071PB / 2121P

A photograph of two children, a girl and a boy, dressed in work clothes. The girl on the left has long blonde hair and is wearing a grey and white long-sleeved shirt with a green graphic of a house and tools, and dark cargo pants. She is holding a hammer in her right hand. The boy on the right is wearing a black beanie, a dark blue jacket, and dark cargo pants. Both children are smiling. The background is a plain white wall with a yellow and black striped caution tape on the floor. Large, semi-transparent white text is overlaid on the image.
